PERSONAL NOTES

JUVENILE DEFENDANTS.

Lads Aged Four and Seven Years Arraigned for Housebreaking. A striking case of juvenile depravity was brought to the attention of Prosecuting Attorney Gordon in Judge Scott's court today, when Myer Johnson, aged four years, and Julius Johnson, aged seven, appeared at court charged with housebreaking. The younger of the two boys was scarcely two feet tall. Both are precocious, however, but they apparently failed to realize the seriousness of the offense charged against

He charged that yesterday evening they wrenched off a blind on one of his office windows and a blind on one of his office windows and gained access to his private papers. He further alleged that they opened his safe and removed a number of checks and valuable papers, most of which they scattered about the floor. They also appropriated several personal letters belonging and addressed to the complainant, which they afterward dropped in a mail box, and which were redelivered to him by a letter carrier.

Mr Smith claims that the total damage Mr. Smith claims that the total damage done by the boys amounted to about \$50. Officer Banagan made the arrests. A nolle pros. was therefore entered.

ENLISTMENT OF FILIPINOS.

The Law Provides for a Force of

One of the important duties to which General Corbin will attend in the Philippines will be the enlistment of natives as a part of the army in the Philippines. The army law authorizes the President to organize a force of not more than 12,000 Fillpinos as scouts, to be officered by Americans. At present 5,000 Filipinos are acting as scouts. They are organized into about forty companies and are serving in almost as many different portions of the islands. It is quite probable that such natives of the present scouting force as desire to enlist in the regular force will be accepted. Lieutenants of the regular army are to be selected as captains of the companies and non-commissioned officers of the regular army will serve as first and secon lieutenants and battalion and squadron staff officers.

THE UNION STATION IDEA.

Chicago to Examine the Question Through a Committee. From the Chicago Tribune.

Whether a union railway station is desirable and practicable for Chicago is a question than which a more difficult one could hardly be asked touching the city's physical development. To dogmatize, therefore, either for or against the idea is as wide of the mark as it is appropriate that its merits should, if possible, be adequately canvassed. It is accordingly a cause for congratulation that the city council has requested the mayor to appoint a special committee of three railway men, three real estate men and three aldermen to inquire into the subject and report.

Steam transportation, especially that higher organization demanded in and for higher organization demanded in and for great centers, is in a primitive and therefore conspicuously crude stage of development. Common streets—dating back some thousands of years—have come to conform to recognized and substantially defensible standards. They are regular, reasonably wide, lined with architecture and constitute. tute not only the thoroughfares but to a large extent the monuments of civilization. large extent the monuments of civilization. Steam railway streets, however—which began to be built scarcely two generations ago, and which have forced their way into cities never planned for their reception, and in which they still have no scientifically assigned place—constitute a nightmare of confusion, duplication, wasted space, inconvenience, clangor and ugliness. The steam railroads of Chicago, in their locations and relations, bespeak precipitate energy, but not structural unity, reasonable convenience for urban, suburban or long-

distance traffic, nor proper adaptation in general to community life.

Although we have dealt awkwardly, how-Although we have dealt awkwardly, however, with the novel and serious problem
of steam thoroughfares in cities, that
problem will yield to progressive intelligence, and every city is bound to reap due
advantage from alertness and foresight in
coping with it. If, therefore, leaving
aside other aspects of the subject, there is
any way—whether by a union station, by
subway connections or by other device—to
articulate directly upon each other the
various railway lines entering Chicago. various railway lines entering Chicago, that result would seem to promise not only enhanced convenience, both for local and through traffic, but also important land through traffic, but also important land and operating economies and a genuine improvement in the city's appearance.

There has been in recent years a marked reduction of the number of railway depots in other cities, and if the mayor shall succeed in securing an able body of men to serve on the proposed committee their subject will be worthy of their best efforts.
